Shape the future of healthcare across Europe as an innovation driver and healthcare entrepreneur.

Join the leading  
European innovation  
network in healthcare

Train to become  
a driver of  
healthcare innovation

Learn from our leading  
experts about the latest  
industry insights and trends

EIT Health is supported by the EIT,  
a body of the European Union

# Summer School Programmes 2020

---

## Energising Global Health Innovation and Entrepreneurship (ENERGHY)

---

ENERGHY 10-day Summer School is a toolbox for a new generation of health innovators. It aims to bridge the gap between science and business by empowering a new generation of would-be professionals highly trained in translating knowledge into citizen-centric products and services.

## Digital Home Care Services (Digital Home Care)

---

The Summer School "Digital Home Care Services" aims to bridge the gap between large sets of health data being available and an overdue shift of healthcare delivery towards home care. By supporting patients with individualized home care systems, disease events should be reduced and patients should be able to actively self-manage their health.

## Data-Driven Prevention Policy in Public Health (DDPPH)

---

Tackle the public health challenges of the future. Learn from experts from three different EU countries, gain a broad insight into the issues facing the health industry, and discover how to create innovative, lasting solutions.

## Innovation Game - A Summer School Applying Serious Game Design on Health Care & Learning (iGame)

---

In Innovation Game, gamification is used as a tool to address real-life healthcare challenges for young people and bring back the output to society. The participants will work in multidisciplinary teams and in close interaction with serious games experts and professionals from business and public health care sector. Solutions will be shared through outreach activities and the last phase will focus on the progress from Innovation to start-up during a visit to Paris.

## Innovating the Joy of Eating for Healthy Ageing (INJOY)

---

INJOY highlights nutrition as a method of illness and health issue prevention, and teaches you how to encourage healthier eating and exercise decisions for our ageing population. As an entrepreneur, you will learn the business process step by step – from ideation through to market entry – as well as how to help citizens improve their eating habits, live better, and live longer.

## Innovative Summer School - Making Physical Education Inclusive and Open to All (InPhysEd)

---

Gain the skills to improve inclusion for pupils with intellectual disabilities within physical education classes. You'll learn alongside industry academics and experts, and seek innovative and practical solutions to open exercise education to people of all abilities.

## Leveraging E-Health Workforce by Advanced Skills (L-eaD)

---

Gain crucial skills and knowledge of digitalization, digital healthcare tools, big data and information systems to increase your understanding of the broad healthcare industry. You will learn how to stay ahead of digital advancements across the entire health sector.

## Setting up a Healthy Business in Healthcare - The Health Entrepreneurship Summer School (SHEBUCAR)

---

Healthcare is a complex landscape with a large variety of domain experts. As a consequence, entrepreneurs have to deal carefully with these experts in order to make an innovation see the light of day. The Health Entrepreneurship Summer School aims to collect challenges from the healthcare providers, take them through a robust development process of analysis, ideation and financing, in order to develop targeted solutions, leading to business plan propositions and ultimately new start-ups.

## What is EIT Health?

EIT Health is a Europe-wide network of health innovators, backed by the European Union. We offer expert education, innovation training and support to help European citizens live longer, healthier lives.

## Summer Schools

Each of our Summer Schools focuses on a different health specialization, to give you in-depth skills and knowledge in your specific field of interest. It's even possible to attend more than one School.
