

EIT Community France

Office Consolidation & Event Manager

Paris, December 2021

EIT Health France, 187 rue du Chevaleret, 75013 Paris

About us

EIT AND EIT KNOWLEDGE AND INNOVATION COMMUNITIES (KICS):

<u>The European Institute of Innovation and Technology (EIT)</u> is an independent EU body strengthening Europe's ability to innovate. The EIT is an integral part of Horizon Europe, the EU's Framework Programme for Research and Innovation.

The Institute is a unique EU initiative that drives innovation across Europe by bringing together organisations from business, education and research and finding innovative solutions to pressing global challenges to create, cooperate and innovate.

The EIT supports the development of dynamic, long-term European partnerships among leading companies, research labs and higher education. These partnerships are called EIT Knowledge and Innovation Communities (KICs) and each is dedicated to finding solutions to a specific global challenge, from climate change and sustainable energy to healthy living and food.

Bringing together more than 2000 partners, the EIT is Europe's largest innovation ecosystem and connects innovators and organisations. We power innovators and entrepreneurs across the EU and beyond to turn their best ideas into cutting-edge products and services. This is crucial to fulfilling the EIT's mission to create jobs and deliver sustainable and smart growth for Europe.

Together with leading partners, the EIT Community offers a wide range of innovation and entrepreneurship activities: education courses that combine technical and entrepreneurial skills, tailored business creation and acceleration services and innovation-driven research projects. This brings new ideas and solutions to the market, turns students into entrepreneurs and, most importantly, delivers innovation.

HUB CONSOLIDATION FRANCE PROJECT:

The Cross-KIC Hub Consolidation programme aims at collocating the individual offices of EIT KICs in selected European cities where more than one KIC currently has individual offices. The main

objectives are increased efficiency gains and visibility for the collocating KICs, improved collaboration between the collocating KICs and providing a flexible working space for the KICs that do not have an office in the specific location.

The benefits expected from the co-location:

- Financial saving (e.g. shared facilities such as hot desks, meeting rooms, equipment);
- Having access to additional facilities (e.g. shared meeting rooms);
- Sharing services to optimise staff time and/or financial saving; and
- Increasing visibility and raising awareness about the EIT Community

Since March 2021 in Paris, the co-location of <u>EIT Health</u> and <u>Climat KIC</u>, plus hot desks for <u>EIT InnoEnergy</u>, <u>EIT Manufacturing</u> and <u>Venture Centre of Excellence</u> is effective. <u>EIT Food</u> and <u>EIT Digital</u> are joining the end of 2021/ 2022. Discussions are ongoing with other KICs and different stakeholders to secure the mid-and long- term roadmap of Hub Consolidation & visibility.

EIT HEALTH FRANCE:

EIT Health brings together leading health organisations in industry, academic and research institutions as well as public sector organisations, to promote healthy living, support active aging and improve healthcare by removing barriers to innovation, promoting talent and education, leveraging enabling technologies and exploiting big data.

EIT Health France is coordinating several pan-European flagship projects contributing to the EIT Health sustainability strategy:

The Venture Centre of Excellence (VCoE) is a public-private Life Science co-investment programme, co-developed with the European Investment Fund, which aims to empower financing for European health start-ups, to accelerate their innovation for citizens. More info can be found HERE.

The "Workin' Health" initiative aims at helping the ecosystem of European Life Sciences and Health companies to meet the new challenges of human resources availability, support the emergence of new jobs and facilitate access to training to skill and re-skill talent across Europe. More info can be found HERE.
